

How Safe is That Safety Belt?

Version Three

by Mark S. Damon

HOW SAFE IS THAT SAFETY BELT?

VERSION THREE

By Mark S. Damon

The newest version of "How Safe Is That Safety Belt?" is now available. A completely new and updated version of the popular training guide for fall protection in general industry and construction has been developed.

Featured is a review of the history of fall protection, including the development of shock absorbers, full body harnesses, and self-retracting lifelines.

Also discussed are the proper use of anchor points, horizontal lifelines, and current OSHA and ANSI fall protection standards. In addition, inspection and cleaning of equipment is covered.

Tests include drops with belts, harnesses, shock absorbers, and self-retracting lifelines.

Running time is 63 minutes and is available in **DVD** or **VHS**. Please specify your preference.

The cost is **\$195** which includes shipping expenses.

For fast service fax or email your orders to Mark Damon

About Mark Damon:

Mark entered the fall protection industry in 1976 with Rose Manufacturing Company, where he served as Vice President.

He served on the OSHA Committee for the fall protection standard that eventually became 1926.500 Subpart M. He has also served on an ANSI subcommittee on fall protection standards for roofing. Mark also worked with the United States Navy on developing their fall protection specifications.

Mark currently is President of Process Marketing Group and represents Capital Safety, which includes DBI, Protecta, and Sinco, in the Midwest.

What others have to say about How Safe is That Safety Belt:

I highly recommend this video to all safety professionals to heighten safety awareness and promote a fun and meaningful safety culture. This is one of the best safety videos I have seen in my 17 year career.

Rob Marriott, Field Operations Manager, U.S. Engineering Company

The fall protection equipment and applications are explained in great detail. Its a great training aid for our staff. "Nice job!"

Dan Williams, Corporate Safety Director, Walton Construction Company

An excellent educational training that will benefit all industries.

Brent Mayhew Safety Director SMACNA-KC
